In Plane Sight Rick Stephens, 2021-06-01 Throughout *In Plane Sight*, Rick Stephens lays out his personal life in sweeping detail to show how igniting his spiritual life with God helped him achieve success at work, at home, and at play. Stephens describes how his experiences were enshrouded within a master plan God had for him from the beginning—not a predestined plan of “things to do,” but a way of living that led to a life of great adventure, joy, and meaning. After becoming president of two different companies, and being fired from both, Stephens started his own company with a promise from God like that of Abraham many years ago, and a spouse fully on board. Horizon Hobby grew from an idea to become a world leader in the design and development of radio control hobby products, including airplanes, helicopters, cars and beyond. Under Stephens’ leadership the company reached \$330 million in revenues with over 700 people in facilities around the world. However, his success in business paled in comparison to the joy of employing biblical principles and living out his faith in the workplace. *In Plane Sight* recounts how Stephens’ spiritual life was just as real and a part of every experience as what he underwent physically. Instead of compartmentalizing his faith as one of several priorities, he shows how life on earth flourishes when viewed through the lens of the Creator and people live according to His plan for them. *In Plane Sight* becomes not Stephens’ story, but God’s story within a man.

Mini model aircraft Hinrik Schulte, The selection and variety of aeroplanes and helicopters under 100 g take-off weight has now become very large. These small and light models have long outgrown their infancy! Most of the models available for purchase come out of the box ready to fly. Nevertheless, the real model builders can rejoice, because there are also real kits for mini models for sale. Occasionally you can even find a construction plan for such a plane. This book brings some system into the diversity of the offer, so that the reader can selectively pick out the model that best meets his requirements. After a bit of theory, Hinrik Schulte presents a selection of 25 mini-models and has divided them into different categories according

to evaluation criteria such as suitability for beginners and flight possibilities. From the content: • Development history of the mini models • Degree of prefabrication and scope of delivery • ARF, BNF models and RTF sets • Brief introduction to the technology • Radio transmission: Infrared, MHz and GHz technology • Transmitters, receivers and servos • Battery technology, charging technology, motors and controllers • Classification into model categories • Simple aerobatic models • Mini-Warbirds • Mini models with brushless drives • Helicopters and other rotorcraft • Coaxial helicopters, micro-helis and quadcopters • Storing, transporting and repairing mini-models • Recycling defective models • The craft project 3D site

Slot Car Racing in the Digital Age Robert Schleicher, Robert Schleicher wrote the book on slot car racing—literally. In the three short years since Schleicher's *Slot Car Racing: Tips, Tricks & Track Plans* was published, the hobby has been virtually transformed by new products and technologies. This new volume, a perfect complement to its predecessor, brings readers and racers up to date, offering a concise, comprehensive overview of slot car racing's developments, along with expert, practical guidance for putting this information to good use. A primer on the latest digital and analog developments for both 1/32 and HO scales, Schleicher's book delivers the lowdown on building cars from individual components on ready-to-race chassis, as well as popular tune-up tips to get even more speed and better handling out of today's cars. Schleicher also provides track tests of 70 cars and a slot-car shootout featuring 23 more vehicles. Finally, Schleicher includes nearly 50 track plans: 14 tabletop-size plans for Scalextric, Classic, Carrera, Sport, SCX, and Ninco brand track; 14 plans modeled on real circuits like Watkins Glen, Monaco, Spa-Francorchamps, Sears Point, and the Bahrain and Shanghai F1 courses; and 17 4x8-foot HO scale plans. Illustrated throughout with color photography and track plan line art, this is the book that no serious slot car racer can afford to be without.

Athearn Collector's Companion Tim Blaisdell, Ed Urmston, 2023-08-22 Irvin R. Athearn was a pioneer in model trains beginning in the late 1940s. He started in his garage putting together O Gauge metal car kits then expanded them to include HO Scale kits. Around the mid-1950s, as a result of the purchase of Globe models, he began producing the iconic F-7 A and B Units in molded plastic. Soon after that came a whole line of plastic freight cars and locomotives. Our first book, *The Standard Guide to Athearn Model Trains*, documented the production of those models from the beginning of the plastic models through 1997. *The Athearn Collector's Companion* covers the original Guide, including models discovered since publication that book, plus all the kits produced until the end of production in October 2009. The original Guide contained approximately 4,000 entries; this book contains about 9,500. We believe you will enjoy the results of our labors as much as we have enjoyed documenting all these model kits...

Mahogany in Scale, 2007 The classic mahogany runabout is a universally popular modeling subject, but many newcomers to the modeling hobby are apprehensive about completing a build. Will they be able to fit the planks perfectly? And how about the glass-smooth clear finish, which tolerates no mistakes in woodwork or polishing? It's really not so hard, just follow the steps outlined here! Model boat buff Patrick Matthews covers the entire process, from choosing a project from one of the many available kits, through building and finishing a mahogany marvel-- even the basics of Radio Control are covered. Additional suggestions are included for simple but effective customizations, as well as a gallery of models from some real masters of the craft-- temptation and encouragement for the modeler to stretch further yet. Patrick Matthews shares his enthusiasm for model boats through contributions to *Ships in Scale* magazine, where he covers Radio Control scale model boats. In his spare time, Patrick is an automotive engineer in Detroit.

Worried?: Science investigates some of life's common concerns Eric Chudler, Lise A. Johnson, 2019-02-26 How scientific reasoning explains our most common daily fears—from germs to natural disasters and everything in between. Quick--what do you worry about most? Your cell phone giving you cancer? The public bathroom you're using being dirty? GMOs in your food? An asteroid strike? Something else? In this witty and evidenced-based book, Lise Johnson and Eric Chudler get to the root of our worries, all the while using science to help tame the anxiety beast. News media, social media, and every mom blog in the world are continuously flagging new things for you to worry about. From obsessing over Lyme disease-infested ticks to worrying about amusement park safety, no-one is immune to the pervasive effects of anxiety brought on by normal, everyday activity. Each topic in this wide-ranging book is subjected to scientific scrutiny, and assigned a place on the "worry index," with the authors concluding the only things worth worrying about are those those that can cause significant harm, are likely to happen, and are (somewhat) preventable. Whether you are a constant worrier or a stick-your-head-in-the-sand-and-hope-for-the best sort of person, you'll find something to love in this witty and informative book.

An Illustrated History of Athearn Advertising Tim Blaisdell, 2023-12-13 The production of Athearn Trains models has been

very well-documented in several books over the years, even since its quite early days. In this work, the progression of the company's advertising is likewise well-documented. Since 1947, there have literally been thousands of pages of advertising presented to magazine readers. The Illustrated History of Athearn Advertising brings out the many styles of ads, the most colorful, and likely some of the best brought to the attention of model railroaders everywhere. This work is the result of years of scouring the many ads printed in many model railroading magazines since the founding of Athearn Trains. The selected pages of advertising shown in these pages share the many messages detailing the virtues of Athearn models and in many cases follows the pricing of their models over the years. The very first work documenting Athearn advertising from the very beginning through the company's seventieth anniversary, this book is a must-have for all model railroaders for deeper insight into the history of Athearn advertising, and the company itself.

Dragons in the Snow Ed Power, 2020-08-12 Edward Power sets the reader down in the midst of a February 2017 blizzard that raked Utah's Uinta Range as nine snowboarders made their way into the backcountry for a day of intense adventure. As the boarders were taking their first turns, expert avalanche forecaster Craig Gordon was tracking the storm and its impact, posting one of the most dire avalanche forecasts and warnings in his career. In *Dragons in the Snow*, Power delves into the research and science behind avalanche forecasting and rescue, weaving in the art of backcountry skiing as well as dramatic tales of avalanche accidents, rescues, and recoveries. And he paints compelling portraits of the men and women who have made the study of avalanches their life's work. The tales told by these avalanche forecasters, as well as the stories of the backcountry riders who may wake the dragon make for not just a compelling read, but also a powerful tool for raising avalanche awareness in everyone who plays in the winter backcountry.
