Art in the Age of the Internet Eva Respini,2018-01-01 Art in the Age of the Internet, 1989 to Today is the first major thematic group exhibition in the United States to examine the radical impact of internet culture on visual art. Featuring 60 artists, collaborations, and collectives, the exhibition is comprised of over 70 works across a variety of mediums, including painting, performance, photography, sculpture, video, web-based projects, and virtual reality. The exhibition is divided into five sections that explore themes such as emergent ideas of the body and notions of human enhancement; the internet as a site of both surveillance and resistance; the circulation and control of images and information; the possibilities for exploring identity and community afforded by virtual domains; and new economies of visibility accelerated by social media.

Throughout, the work in the exhibition addresses the internet-age democratization of culture that comprises our current moment. The earliest work in the exhibition is from 1989, the year that Tim Berners-Lee invented the World Wide Web. This development, and others that followed in quick succession, modernized the internet, and in the process radically changed our way of life--from how we access and generate information, make friends and share experiences, to how we imagine our future bodies and how nations police national security. 1989 also marked a watershed moment across the globe, with significant shifts in politics, geographies, and economies. Events such as the fall of the Berlin Wall and protests in Tiananmen Square signaled the beginning of our current globalized age, which cannot be imagined without the internet.

Consider the Fork Bee Wilson, 2012-10-25 Bee Wilson is the food writer and historian who writes as the 'Kitchen Thinker' in the Sunday Telegraph, and is the author of *Swindled!*. Her charming and original new book, *Consider the Fork*, explores how the implements we use in the kitchen have shaped the way we cook and live. A wooden spoon - most trusted and loveable of kitchen implements - looks like the opposite of 'technology', as the word is normally understood. But look closer. Is it oval or round? Does it have an extra-long handle to give your hand a place of greater safety from a hot skillet? Or a pointy bit at one side to get the lumpy bits in the corner of the pan? It took countless inventions to get to the well-equipped kitchens we have now, where our old low-tech spoon is joined by mixers, freezers and microwaves, but the story of human invention in the kitchen is largely unseen. Discovering the histories of our knives, ovens and kitchens themselves, Bee Wilson explores, among many other things, why the French and Chinese have such different cultures of the knife; and why Roman kitchens contain so many implements we recognize. Encompassing inventors, scientists, cooks and chefs, this is the previously unsung history of our kitchens.
